Dear Doug

Western Rock Products is in the process of gathering information pertaining to our submittal of documentation for our permit through your organization. Since we last spoke I have met with our engineer and discussed our survey needs and he has obtained an outside organization to perform this task. Mapping and topographic detailed information will be completed as soon as possible in order to provide these documents in our submittal for our permit. I will be contacting you for some assistance in preparing this permit application as this is our first venture into the hard rock arena. I appreciate your assistance and look forward to working with your organization.

Sincerely

Robert Roth
Director of Safety
